

# Mongolian Adventure: Animal Trading Cards - Example

Photography by Nic Bishop

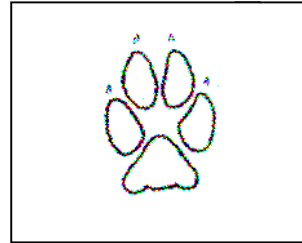

Animal: *Snow leopard*  
Habitat: *mountains of the Himalayas*  
Adult weight: *75 – 85 pounds*  
Adult length: *4 feet*  
Favorite food: *ibex*

## Description:

*Snow leopards are ...*

**Why is this animal endangered?**

*Herders raise sheep and goats for food, milk, and fur. These animals graze on land formerly used by wild goats and ibex. Since the snow leopards can't find and eat the wild goats and ibex, they eat the herds of sheep and goats raised by the herders. Consequently the herders kill the snow leopards.*
