

## Tracking Animal Imports

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Using Kakapo Rescue: Saving the World's Strangest Parrot, label the map below and identify animal importation. Use a different colored pencil or marker for each animal to identify how animals are imported from one country to another. The line should start in the animal's native country and point to the country to which it has been imported. For added detail, label each arrow with the approximate dates, the animal, who imported the animal and how it was imported. The first one is done for you.
